

SakshamMatch - SIH26092

AI-Driven Scheme Matching for Marginalized Entrepreneurs

Problem Statement Code: SIH26092

Ministry: Ministry of Social Justice & Empowerment

Theme: Smart Automation

Team: [Your Team Name]

❑ Problem Statement

63 million MSMEs employ 120M+ people in India, but:

- 41% of SC/ST women are unaware of government schemes
- 70% of rural youth lack basic digital skills
- Schemes are fragmented across 10+ portals
- Complex eligibility rules in PDFs and bureaucratic language

Result: Low last-mile awareness despite large budgets.

❑ Solution

SakshamMatch is an AI-driven platform that:

1. Takes entrepreneur profile (8-10 questions)
2. Matches with eligible government schemes using AI
3. Explains "why you qualify" for each scheme
4. Provides document checklist and application links
5. Targets SC/ST/OBC, women, rural entrepreneurs

❑ Key Features

- ✓ AI-driven scheme matching with explainability
- ✓ Multi-channel access (Web PWA + WhatsApp + CSC Dashboard)
- ✓ Low-literacy friendly (voice input, icons, vernacular languages)
- ✓ Assisted onboarding via CSCs and NGOs
- ✓ Analytics dashboard for MoSJE

🔧 Tech Stack

Component	Technology
Frontend	React + Next.js + Tailwind CSS
Backend	FastAPI + SQLAlchemy
Database	PostgreSQL + Redis
AI/ML	spaCy + XGBoost + LangChain
Deployment	Vercel + Render + Supabase
Version Control	Git + GitHub

📁 Project Structure

```

└── README.md          # This file
```

🔧 Getting Started

Prerequisites

- Node.js 18+ (for frontend)
- Python 3.10+ (for backend)
- PostgreSQL 15+ (database)
- Redis (caching)

Frontend Setup

```
cd frontend  
npm install  
npm run dev
```

Backend Setup

```
cd backend
pip install -r requirements.txt
uvicorn main:app --reload
```

Database Setup

```
cd database
psql -U postgres -f schema.sql
psql -U postgres -f seed_data.sql
```

☒ Differentiation from Existing Solutions

Feature	myScheme	Startup India	SakshamMatch
Target Users	Generic citizens	Formal startups	Marginalized entrepreneurs
Matching Logic	Rule-based filters	Manual browsing	AI + Rules + Explainability
Access Channels	Web only	Web only	Web + WhatsApp + CSC
Language Support	Limited	English-heavy	Hindi + 10+ regional + Voice
Assisted Onboarding	No	No	Yes (CSC/NGO)
